

# D-Cell Battery Holder

The D-Cell Battery Holder provides 9 volts of DC power by combining 6 D-cell batteries in a convenient and easy to use holder. D-cell batteries can provide an extended amount of power to your FreezeAlarm, WaterAlarm, MiniAlarm or any other product that requires 9 volt power to operate.

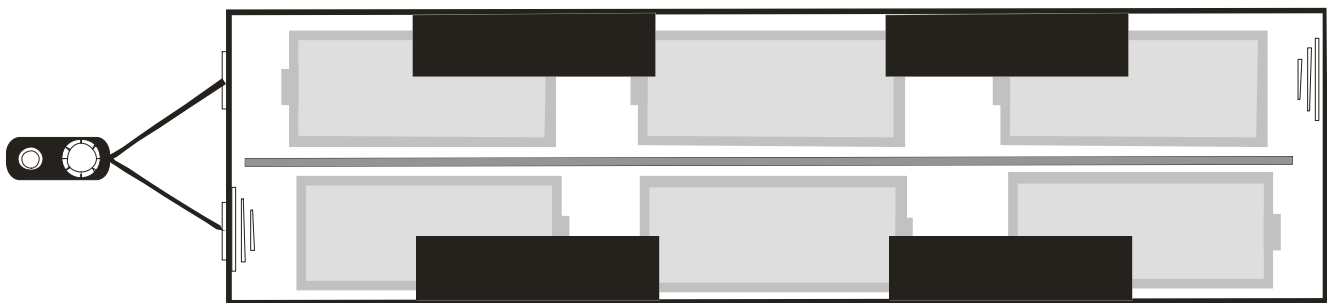

We have tested this battery holder and found that it provides approximately 10 days of power to our Intermediate or Deluxe FreezeAlarm when the main power is out and the unit is not making any phone calls. After 10 days, the FreezeAlarm may stop functioning.

If your FreezeAlarm is calling out to three different phone numbers every fifteen minutes, the Battery Holder using 6 fresh D-cell batteries has been tested to provide approximately 3 days of power before the FreezeAlarm stops functioning.

## Instructions for use:

1. Insert six, new D-cell batteries in the holder as shown in the diagram on the battery holder..
2. Make sure the main power to your FreezeAlarm or other device is off and the power cord is unplugged.
3. Plug in the battery snaps to the battery connection on the FreezeAlarm. Make sure the battery snaps are plugging into the proper snap connection on the FreezeAlarm. On our FreezeAlarms, this can be difficult because of the location of the battery snaps. If you need to remove the cover of the FreezeAlarm to make the connections, be sure to “ground” yourself and make every effort to avoid touching the circuit board itself or any of the components on the circuit board. To ground yourself, stand on a non-carpeted surface and simply touch any plumbing pipe, refrigerator, washing or dishwashing machine. Remove your hand and then plug in the battery snaps to the FreezeAlarm’s battery connections.
4. Connect the main power to your FreezeAlarm or other device. If using this with our Intermediate or Deluxe FreezeAlarm, check the battery voltage via the menu options. If using this with any other products, make sure you test the operation of the unit on battery power to ensure the connections were properly made.

Battery Carrousel (p/n: BATTHOLD6D)

## Technical Support:

For questions about using our products, contact Customer Service at 952-448-2217 or email them at [customerservice@controlproductsinc.com](mailto:customerservice@controlproductsinc.com). Visit our web site at [www.protectedhome.com](http://www.protectedhome.com). The part number for the D-Cell Battery Holder is BATTHOLD6D.

Components for this device are manufactured in China and assembled in the United States by Control Products, Inc. for Protected Home  
Protected Home is a division of Control Products, Inc.
