Important Safety Instructions

Your Sentry has been carefully designed to give you years of safe, reliable performance. As with all electrical equipment, however, there are a few basic precautions you should take to avoid hurting yourself or damaging the unit:

- Read the installation and operating instructions in this guide carefully. Be sure to save it for future reference.
- Read and follow all warning and instruction labels on the product itself.
- To protect the Sentry from overheating, make sure all openings on the unit are not blocked. Do not place on or near a heat source, such as a radiator or heat register.
- Do not use your Sentry near water, or spill liquid of any kind into it.
- Be certain that your power source matches the rating in the specifications of this manual. If you're not sure of the type of power supply to your facility, consult your dealer or local power company.
- Do not allow anything to rest on the power cord. Do not locate this product where the cord will be abused by persons walking on it.
- Do not overload wall outlets and extension cords, as this can result in the risk of fire or electric shock.
- Never push objects of any kind into this product through ventilation holes as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock.
- To reduce the risk of electric shock, do not disassemble this product, but return it to Sensaphone Customer Service, or another approved repair facility, when any service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the unit is subsequently used.
- If anything happens that indicates that your Sentry is not working properly or has been damaged, unplug it immediately and follow the procedures in the manual for having it serviced. Return the unit for servicing under the following conditions:
 1. The power cord or plug is frayed or damaged.
 2. Liquid has been spilled into the product or it has been exposed to water.
 3. The unit has been dropped, or the enclosure is damaged.
 4. The unit doesn't function normally when you're following the operating instructions.
- To reduce the risk of fire or injury to persons, read and follow these instructions:
 1. Use only the specified type and size battery.
 2. Do not dispose of the battery in a fire. The cell may explode. Check with local codes for possible special disposal instructions.
 3. Do not open or mutilate batteries. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
 4. Exercise care in handling batteries in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
 5. Remove main power connections before replacing the battery.

FCC Requirements

Part 15: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

2 YEAR LIMITED WARRANTY

PLEASE READ THIS WARRANTY CAREFULLY BEFORE USING THE PRODUCT.

THIS LIMITED WARRANTY CONTAINS SENSAPHONE'S STANDARD TERMS AND CONDITIONS. WHERE PERMITTED BY THE APPLICABLE LAW, BY KEEPING YOUR SENSAPHONE PRODUCT BEYOND THIRTY (30) DAYS AFTER THE DATE OF DELIVERY, YOU FULLY ACCEPT THE TERMS AND CONDITIONS SET FORTH IN THIS LIMITED WARRANTY.

IN ADDITION, WHERE PERMITTED BY THE APPLICABLE LAW, YOUR INSTALLATION AND/OR USE OF THE PRODUCT CONSTITUTES FULL ACCEPTANCE OF THE TERMS AND CONDITIONS OF THIS LIMITED WARRANTY (HEREINAFTER REFERRED TO AS "LIMITED WARRANTY OR WARRANTY"). IF YOU DO NOT AGREE TO THE TERMS AND CONDITIONS THIS WARRANTY, INCLUDING ANY LIMITATIONS OF WARRANTY, INDEMNIFICATION TERMS OR LIMITATION OF LIABILITY, THEN YOU SHOULD NOT USE THE PRODUCT AND SHOULD RETURN IT TO THE SELLER FOR A REFUND OF THE PURCHASE PRICE. THE LAW MAY VARY BY JURISDICTION AS TO THE APPLICABILITY OF YOUR INSTALLATION OR USE ACTUALLY CONSTITUTING ACCEPTANCE OF THE TERMS AND CONDITIONS HEREIN AND AS TO THE APPLICABILITY OF ANY LIMITATION OF WARRANTY, INDEMNIFICATION TERMS OR LIMITATIONS OF LIABILITY.

1. **WARRANTOR:** IN THIS WARRANTY, WARRANTOR SHALL MEAN "DEALER, DISTRIBUTOR, AND/OR MANUFACTURER."
2. **ELEMENTS OF WARRANTY:** THIS PRODUCT IS WARRANTED TO BE FREE FROM DEFECTS IN MATERIALS AND CRAFTSMANSHIP WITH ONLY THE LIMITATIONS AND EXCLUSIONS SET OUT BELOW.
3. **WARRANTY AND REMEDY:** TWO-YEAR WARRANTY — IN THE EVENT THAT THE PRODUCT DOES NOT CONFORM TO THIS WARRANTY AT ANY TIME DURING THE TIME OF TWO YEARS FROM ORIGINAL PURCHASE, WARRANTOR WILL REPAIR THE DEFECT AND RETURN IT TO YOU AT NO CHARGE.

THIS WARRANTY SHALL TERMINATE AND BE OF NO FURTHER EFFECT AT THE TIME THE PRODUCT IS: (1) DAMAGED BY EXTRANEOUS CAUSE SUCH AS FIRE, WATER, LIGHTNING, ETC. OR NOT MAINTAINED AS REASONABLE AND NECESSARY; OR (2) MODIFIED; OR (3) IMPROPERLY INSTALLED; OR (4) MISUSED; OR (5) REPAIRED OR SERVICED BY SOMEONE OTHER THAN WARRANTORS' AUTHORIZED PERSONNEL OR SOMEONE EXPRESSLY AUTHORIZED BY WARRANTOR'S TO MAKE SUCH SERVICE OR REPAIRS; (6) USED IN A MANNER OR PURPOSE FOR WHICH THE PRODUCT WAS NOT INTENDED; OR (7) SOLD BY ORIGINAL PURCHASER.

LIMITED WARRANTY, LIMITATION OF DAMAGES AND DISCLAIMER OF LIABILITY FOR DAMAGES: THE WARRANTOR'S OBLIGATION UNDER THIS WARRANTY IS LIMITED TO REPAIR OR REPLACEMENT OF THE PRODUCT, AT THE WARRANTOR'S OPTION AS TO REPAIR OR REPLACEMENT. IN NO EVENT SHALL WARRANTORS BE LIABLE OR RESPONSIBLE FOR PAYMENT OF ANY INCIDENTAL, CONSEQUENTIAL, SPECIAL AND/OR PUNITIVE DAMAGES OF ANY KIND, INCLUDING BUT NOT LIMITED TO ANY LABOR COSTS, PRODUCT COSTS, LOST REVENUE, BUSINESS INTERRUPTION LOSSES, LOST PROFITS, LOSS OF BUSINESS, LOSS OF DATA OR INFORMATION, OR FINANCIAL LOSS, FOR CLAIMS OF ANY NATURE, INCLUDING BUT NOT LIMITED TO CLAIMS IN CONTRACT, BREACH OF WARRANTY OR TORT, AND WHETHER OR NOT CAUSED BY WARRANTORS' NEGLIGENCE. IN THE EVENT THAT IT IS DETERMINED IN ANY ADJUDICATION THAT THE LIMITED WARRANTIES OF REPAIR OR REPLACEMENT ARE INAPPLICABLE, THEN THE PURCHASER'S SOLE REMEDY SHALL BE PAYMENT TO THE PURCHASER OF THE ORIGINAL COST OF THE PRODUCT, AND IN NO EVENT SHALL WARRANTORS BE LIABLE OR RESPONSIBLE FOR PAYMENT OF ANY INCIDENTAL, CONSEQUENTIAL, SPECIAL AND/OR PUNITIVE DAMAGES OF ANY KIND, INCLUDING BUT NOT LIMITED TO ANY LOST REVENUE, BUSINESS INTERRUPTION LOSSES, LOST PROFITS, LOSS OF BUSINESS, LOSS OF DATA OR INFORMATION, OR FINANCIAL LOSS, FOR CLAIMS OF ANY NATURE, INCLUDING BUT NOT LIMITED TO CLAIMS IN CONTRACT, BREACH OF WARRANTY OR TORT, AND WHETHER OR NOT CAUSED BY WARRANTORS' NEGLIGENCE.

WITHOUT WAIVING ANY PROVISION IN THIS LIMITED WARRANTY, IF A CIRCUMSTANCE ARISES WHERE WARRANTORS ARE FOUND TO BE LIABLE FOR ANY LOSS OR DAMAGE ARISING OUT OF MISTAKES, NEGLIGENCE, OMISSIONS, INTERRUPTIONS, DELAYS, ERRORS OR DEFECTS IN WARRANTORS' PRODUCTS OR SERVICES, SUCH LIABILITY SHALL NOT EXCEED THE TOTAL AMOUNT PAID BY THE CUSTOMER FOR WARRANTORS' PRODUCT AND SERVICES OR \$250.00, WHICHEVER IS GREATER. YOU HEREBY RELEASE WARRANTORS FROM ANY AND ALL OBLIGATIONS, LIABILITIES AND CLAIMS IN EXCESS OF THIS LIMITATION.

INDEMNIFICATION AND COVENANT NOT TO SUE: YOU WILL INDEMNIFY, DEFEND AND HOLD HARMLESS WARRANTORS, THEIR OWNERS, DIRECTORS, OFFICERS, EMPLOYEES, AGENTS, SUPPLIERS OR AFFILIATED COMPANIES, AGAINST ANY AND ALL CLAIMS, DEMANDS OR ACTIONS BASED UPON ANY LOSSES, LIABILITIES, DAMAGES OR COSTS, INCLUDING BUT NOT LIMITED TO DAMAGES THAT ARE DIRECT OR INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL, AND INCLUDING ATTORNEYS FEES AND LEGAL COSTS, THAT MAY RESULT FROM THE INSTALLATION, OPERATION, USE OF, OR INABILITY TO USE WARRANTORS' PRODUCTS AND SERVICES, OR FROM THE FAILURE OF THE WARRANTORS' SYSTEM TO REPORT A GIVEN EVENT OR CONDITION, WHETHER OR NOT CAUSED BY WARRANTORS' NEGLIGENCE.

YOU AGREE TO RELEASE, WAIVE, DISCHARGE AND COVENANT NOT TO SUE WARRANTORS, THEIR OWNERS, DIRECTORS, OFFICERS, EMPLOYEES, AGENTS, SUPPLIERS OR AFFILIATED COMPANIES, FOR ANY AND ALL LIABILITIES POTENTIALLY ARISING FROM ANY CLAIM, DEMAND OR ACTION BASED UPON ANY LOSSES, LIABILITIES, DAMAGES OR COSTS, INCLUDING BUT NOT LIMITED TO DAMAGES THAT ARE DIRECT OR INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL, AND INCLUDING ATTORNEYS FEES AND LEGAL COSTS, THAT MAY RESULT FROM THE INSTALLATION, OPERATION, USE OF, OR INABILITY TO USE WARRANTORS' PRODUCTS AND SERVICES, OR FROM THE FAILURE OF THE WARRANTORS' SYSTEM TO REPORT A GIVEN EVENT OR CONDITION, WHETHER OR NOT CAUSED BY WARRANTORS' NEGLIGENCE, EXCEPT AS NECESSARY TO ENFORCE THE EXPRESS TERMS OF THIS LIMITED WARRANTY.

EXCLUSIVE WARRANTY: THE LIMITED WARRANTY OR WARRANTIES DESCRIBED HEREIN CONSTITUTE THE SOLE WARRANTY OR WARRANTIES TO THE PURCHASER. ALL IMPLIED WARRANTIES ARE EXPRESSLY DISCLAIMED, INCLUDING: THE WARRANTY OF MERCHANTABILITY AND THE WARRANTY OF FITNESS FOR A PARTICULAR USE AND THE WARRANTY OF FITNESS FOR A

Sentry Installation and Setup Guide

PARTICULAR PURPOSE AND THE WARRANTY OF NON-INFRINGEMENT AND/OR ANY WARRANTY ARISING FROM A COURSE OF DEALING, USAGE, OR TRADE PRACTICE.

IT MUST BE CLEAR THAT THE WARRANTORS ARE NOT INSURING YOUR PREMISES OR BUSINESS OR GUARANTEEING THAT THERE WILL NOT BE DAMAGE TO YOUR PERSON OR PROPERTY OR BUSINESS IF YOU USE THIS PRODUCT. YOU SHOULD MAINTAIN INSURANCE COVERAGE SUFFICIENT TO PROVIDE COMPENSATION FOR ANY LOSS, DAMAGE, OR EXPENSE THAT MAY ARISE IN CONNECTION WITH THE USE OF PRODUCTS OR SERVICES, EVEN IF CAUSED BY WARRANTORS' NEGLIGENCE. THE WARRANTORS ASSUME NO LIABILITY FOR INSTALLATION OF THE PRODUCT AND/OR INTERRUPTIONS OF THE SERVICE DUE TO STRIKES, RIOTS, FLOODS, FIRE, AND/OR ANY CAUSE BEYOND SELLER'S CONTROL, FURTHER SUBJECT TO THE LIMITATIONS EXPRESSED IN ANY LICENSE AGREEMENT OR OTHER AGREEMENT PROVIDED BY WARRANTORS TO PURCHASER.

THE AGREEMENT BETWEEN THE WARRANTORS AND THE PURCHASER, INCLUDING BUT NOT LIMITED TO THE TERMS AND CONDITIONS HEREIN SHALL NOT BE GOVERNED BY THE CONVENTION FOR THE INTERNATIONAL SALE OF GOODS. WHERE APPLICABLE, THE UNIFORM COMMERCIAL CODE AS ADOPTED BY THE STATE OF DELAWARE SHALL APPLY.

4. PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: IN THE EVENT THAT THE PRODUCT DOES NOT CONFORM TO THIS WARRANTY, THE PRODUCT SHOULD BE SHIPPED OR DELIVERED FREIGHT PREPAID TO A WARRANTOR WITH EVIDENCE OF ORIGINAL PURCHASE.

5. LEGAL REMEDIES AND DISCLAIMER: SOME JURISDICTIONS MAY NOT ALLOW, OR MAY PLACE LIMITS UPON, THE EXCLUSION AND/OR LIMITATION OF IMPLIED WARRANTIES, INCIDENTAL DAMAGES AND/OR CONSEQUENTIAL DAMAGES FOR SOME TYPES OF GOODS OR PRODUCTS SOLD TO CONSUMERS AND/OR THE USE OF INDEMNIFICATION TERMS. THUS, THE EXCLUSIONS, INDEMNIFICATION TERMS AND LIMITATIONS SET OUT ABOVE MAY NOT APPLY, OR MAY BE LIMITED IN THEIR APPLICATION, TO YOU. IF THE IMPLIED WARRANTIES CAN NOT BE EXCLUDED, AND THE APPLICABLE LAW PERMITS LIMITING THE DURATION OF IMPLIED WARRANTIES, THEN THE IMPLIED WARRANTIES HEREIN ARE TO BE LIMITED TO THE SAME DURATION AS THE APPLICABLE WRITTEN WARRANTY OR WARRANTIES HEREIN. THE WARRANTY OR WARRANTIES HEREIN MAY GIVE YOU SPECIFIC LEGAL RIGHTS THAT WILL DEPEND UPON THE APPLICABLE LAW. YOU MAY ALSO HAVE OTHER LEGAL RIGHTS DEPENDING UPON THE LAW IN YOUR JURISDICTION.

6. CHOICE OF FORUM AND CHOICE OF LAW: IN THE EVENT THAT A DISPUTE ARISES OUT OF OR IN CONNECTION WITH THIS LIMITED WARRANTY, THEN ANY CLAIMS OR SUITS OF ANY KIND CONCERNING SUCH DISPUTES SHALL ONLY AND EXCLUSIVELY BE BROUGHT IN EITHER THE COURT OF COMMON PLEAS OF DELAWARE COUNTY, PENNSYLVANIA OR THE UNITED STATES DISTRICT COURT FOR THE EASTERN DISTRICT OF PENNSYLVANIA.

REGARDLESS OF THE PLACE OF CONTRACTING OR PERFORMANCE, THIS LIMITED WARRANTY AND ALL QUESTIONS RELATING TO ITS VALIDITY, INTERPRETATION, PERFORMANCE AND ENFORCEMENT SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAWS OF THE STATE OF DELAWARE, WITHOUT REGARD TO THE PRINCIPLES OF CONFLICTS OF LAW.

Effective date 01/01/2025

CHAPTER 1: INSTALLATION

INTRODUCTION

Congratulations on your purchase of the Sentry Monitoring System. The system is designed to be an easy, cost-effective, cloud-based monitoring system to notify you when equipment or conditions go awry. The internet browser-based programming makes the device easy to use from any computer or tablet. Monitored conditions can include temperature, humidity levels, pressure, leak detection, UPS systems, and more. The system allows multiple users to be notified immediately of any detected problems. Notification can occur via voice call, e-mail or SMS (text message). The internal battery backup system ensures the unit will continue to run if main power fails.

ACTIVATION

A subscription plan is required to activate cellular service so that the device can go online. A Subscription Plan Registration form has been included with your Sentry. Fill out the form and send via email or fax to Sensaphone. Note that Sentry units typically ship deactivated, even if a subscription has been prepaid.

FEATURES

The Sentry includes the following key features:

- Five sensor inputs to monitor environmental conditions and/or alarm contacts from other equipment.
- Works with AT&T, Verizon and Rogers cellular networks using LTE-M technology.
- Device location provided using built-in GPS technology
- Battery backup for uninterrupted performance.
- Compact design allows wall-mount or weatherproof installation.
- Notification via e-mail, text message and voice call.
- Relay output capable of automatic or manual control.
- Cloud-based user interface for programming and alarm delivery.
- Available in optional weatherproof NEMA 4X enclosure
- Optional DIN rail mounting kit available (part # SNT-DIN-KIT).
- Compatible with the Sensaphone mobile app

TECHNICAL SUPPORT

If any questions arise upon installation or operation of the Sentry please contact Sensaphone Technical Support at 877.373.2700 or support@sensaphone.com and have the following information available:

- Date of purchase _____
- Serial number _____

* The serial number is located on the back of the unit. Prior to mounting the Sentry write down the serial number above so that you won't have to remove the device in the future in the event of re-activation, troubleshooting, or if requested by technical support.

Technical support is available from 8:00 AM to 5:00 PM, M-F, Eastern time.

ABOUT THIS MANUAL

This manual comprises the instructions necessary to install and setup the Sentry. You should thoroughly read this manual to establish a basic understanding of the system and keep it as a reference.

INSTALLATION AND CONFIGURATION

PHYSICAL DESCRIPTION

The Sentry is housed in a 6.1" x 4.7" x 0.9" enclosure, which can be easily mounted on a wall or back panel.

LAYOUT

The Sentry has connections for five sensor inputs, a relay output, and 7.5VDC power. See figure below:

Figure 1: Layout of the Sentry

- | | |
|------------------------------|--------------------------------|
| 1) Antennas | 5) Power Jack |
| 2) On/Off Switch | 6) Signal Strength LEDs |
| 3) Power, Online, LEDs | 7) Sensor Input Terminal Strip |
| 4) Alarm & Relay Output LEDs | 8) Relay Output Terminal Strip |

SENSOR INPUTS

The sensor inputs labeled zones 1-5 are designed to interface with normally open/normally closed devices and 2.8K temperature sensors.

POWER ON LED (GREEN)

This light indicates that the Sentry unit is powered and operational.

ALARM LED (RED)

The Alarm LED indicates if an alarm exists.

ONLINE LED (GREEN)

This light indicates that the Sentry unit is communicating with the Sentry servers.

RELAY LED (YELLOW)

This light indicates if the Relay Output is On or Off.

INSTALLATION

This section provides information on:

- Operating environment
- Installation
- Connecting sensors

PARTS REQUIRED

- Screwdriver and #8 screws
- Computer, tablet or smartphone w/Internet connection

OPERATING ENVIRONMENT

The Sentry and its antennas are not weatherproof and should be installed indoors or inside of a weatherproof enclosure. Make sure you have adequate cellular coverage at the installation location. To get a good GPS signal the antenna must have minimal obstructions between the antenna and the sky. Do not install the device inside of a metal enclosure.

Before you install the Sentry be sure that your operating environment meets the physical requirements of the equipment.

Operating Temperature:	32° – 122° Fahrenheit (0° – 50° C)
Humidity:	5 – 90 %RH, non-condensing
Power:	90-264VAC 50/60 Hz outlet within 6'

POWER

Connect the included 7.5V DC power supply to the power jack on the Sentry and then plug the power adapter into a 90-264V AC power outlet.

ANTENNAS

Attach the long, hinged whip antenna to the 'Cellular' antenna connector. Do not over tighten. Adjust the antenna so that its pointing towards the sky. Connect the cable for the GPS antenna to the GPS connector. Place the GPS antenna in a location where it has the best view of the sky (inside a non-metallic enclosure or near an exterior window or wall.)

WALL MOUNT INSTALLATION

The Sentry can be wall mounted using dry wall anchors and (4) #8 screws. Follow the steps below:

- 1) Install four drywall anchors (if necessary). Attach the Sentry using four #8 tapping screws. See Figure 2 for dimensions.
- 2) Attach sensors to the zone terminals.
- 3) Plug the power adaptor into a 90-264VAC 50/60Hz outlet.
- 4) Connect the whip antenna to the Cellular connector. Connect the GPS antenna to the GPS connector.

Sentry weatherproof mounting dimensions

CONNECTING SENSORS

The Sentry is compatible with a wide variety of sensors including normally open/normally closed contacts and 2.8K temperature sensors. Compatible sensors and accessories are shown on the Sensaphone website. Sensors may be connected while the device is powered on or off. A proper size screwdriver is provided for your convenience. Contact Sensaphone or your Sensaphone reseller for assistance in selecting sensors for your monitoring requirements. A list of sensors and accessories is shown in Appendix B. Follow the instructions below to properly wire and configure the inputs for each type of electrical signal.

Warning: The inputs are designed to work with low voltage signals. DO NOT connect voltages greater than 3.3V to the inputs. DO NOT connect 120VAC to the inputs.

GENERAL WIRING CONSIDERATIONS

Most dry contact sensors can be connected to the Sentry using inexpensive 2-conductor twisted-pair cable as small as #24 AWG. For temperature sensors, use the wire chart below as a reference for selecting the appropriate wire gauge. Note that if the sensor is located far from the unit or if you are running cable in an electrically noisy environment, you should seriously consider using shielded cable. This will shield the signal from electrical interference, thereby preventing false readings and/or damage to the unit. For your convenience, Sensaphone has 22 gauge shielded cable available in 50’ lengths (part number FGD-0010). To minimize electrical noise coupling between sensor wires and other wiring, follow the guidelines listed below:

- Route the power supply cables to the unit by a separate path then the wiring to the sensor inputs. Where paths must cross, their intersection should be perpendicular.
- Do not run sensor wiring and AC power in the same conduit.
- Segregate wiring by signal type. Bundle wiring with similar electrical characteristics together.
- If shielded cable is used, tie the shield to the input common terminal.

<u>Wiring Distance</u>	<u>Minimum Wire Gauge</u>
700’	#24 AWG
1500’	#22 AWG
2500’	#20 AWG

The zone terminal strip has five pairs of terminals for connecting up to five sensors. See illustration below.

NORMALLY OPEN / NORMALLY CLOSED DRY CONTACTS

Dry contact sources consist of alarm relays or switches that are isolated and have no external voltage applied. These devices can be connected directly to the zone terminals without regard for polarity. Choose a zone and connect the wires to the corresponding screw terminals for that zone. The following figure shows how to connect a dry contact sensor:

Wiring a Dry Contact Sensor

2.8K TEMPERATURE SENSORS

The Sentry is compatible with 2.8K temperature sensors that match the curve data listed in the tables in Appendix D. The monitoring temperature range of the 2.8K thermistor is -109 to 115°F (-85° to 57°C). Temperature sensors can be connected directly to the zone terminals without regard for polarity. Choose an alarm input and connect the wires to the corresponding screw terminals for that zone. 2.8K temperature sensors are available from Sensaphone. See Appendix B for part numbers. The figure below shows how to connect a temperature sensor:

Wiring a Temperature Sensor

RELAY OUTPUT WIRING

The Sentry includes a relay output (switch) that can be used to turn on a light, siren, or other device whenever an alarm occurs. The output is a normally-open (i.e. off) dry contact that can be used for low voltage switching. The relay is rated for up to 30VAC/VDC 1 Amp. A sample wiring diagram is shown below:

The relay can be controlled manually (via the website or App) or automatically based on specific inputs or alarms. See chapter 3 for details.

BATTERY BACKUP

The Sentry has an internal rechargeable battery backup pack (part #BAT-0036) which will provide up to 12 hours of backup time in the event of a power failure. The unit will charge the battery and monitor its charge level. The percent charge can be viewed on the website. The Sentry contains circuitry to protect the battery from deep discharge damage and will disconnect the battery when all of its available energy has been expended. The battery backup module should last 4 to 5 years.

To replace the battery pack follow the steps below:

1. Disconnect the power adapter from the Sentry.
2. Remove the input and output terminal strips.
3. Disconnect the antennas.
4. Remove the four screws from the end-panel with the antenna connectors.
5. Carefully slide out the circuit board.
6. Cut the two tie wraps securing the battery pack.
7. Remove the battery connector with the red & black wires from the circuit board.
8. Remove the battery pack and dispose of properly.
9. Place the new battery pack into the battery holder. Secure it with new tie wraps.
10. Plug the connector into the circuit board. Note that it is polarity sensitive and the notches on the connector will only allow it to go in one way.
11. Slide the circuit board back into the housing
12. Replace the end panel making sure the LED light pipes are flush with the front of the panel and then secure it with the four screws.
13. Reattach the antennas, terminals blocks and power supply.

MEMORY/CLOCK BATTERY

The Sentry contains a CR2032 lithium battery to backup certain values in SRAM memory as well as the real-time clock. This battery should last between 5-10 years depending on how much time the device is powered off. See above procedure to access the CR2032 battery.

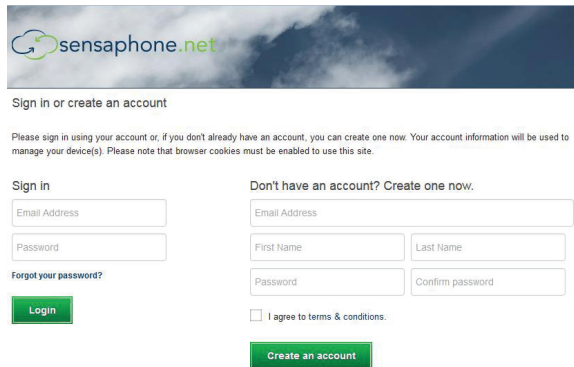

RESETTING THE SENTRY TO FACTORY DEFAULT SETTINGS

In the event that you can no longer connect to your Sentry, you can reset the unit to factory defaults. On the back of the unit is a small hole. Beneath the hole is a push button. Insert a paper clip or similar item into the hole and push the button for 5 seconds while the device is powered on. The Sentry will erase all of its programming and then reboot automatically. Alternatively, you can also reset the Sentry to defaults from the Sensaphone.net website if the device is online. Go to the Manage Devices page, under the Admin menu. Select the device, choose Reset to Default Values from the drop down, and click Submit.

CHAPTER 2: SET UP

When your Sentry “Online” LED is lit you can continue with the following website section.

1. Open an internet browser and go to www.sensaphone.net.
2. Fill in the form to create a new account.

The screenshot shows the Sensaphone.net website with a header image of a cloudy sky. Below the header, there is a section titled "Sign in or create an account". A paragraph of text explains the login process. There are two main sections: "Sign in" and "Don't have an account? Create one now.".

☐ I agree to terms & conditions.

3. Once you are logged in, click *Admin*, then *Manage Devices*. In the “Add a Device” section, enter the Serial Number of your Sentry and enter a device name. Click the *Add Device* button when finished.

The screenshot shows the "manage devices" page on Sensaphone.net. The header includes the Sensaphone.net logo and the text "manage devices". Below the header, there is a navigation bar with "Dashboard", "Users", and "Admin".

Manage Devices

Your Devices

There are no devices on this account.
Fill out the form on the right to add a device.

Add a Device

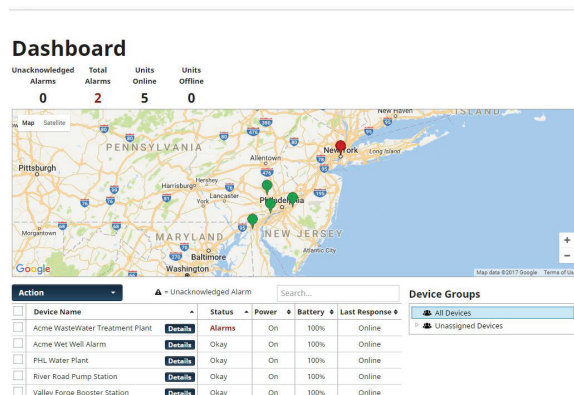

Serial Number

Device Name

Your Sentry is now online with the Sensaphone.net website. Read the section below to learn how to view status and program your device.

DESCRIPTION OF WEB PAGES

DASHBOARD

The screenshot shows the dashboard of the Sensaphone.net website. At the top, there is a summary section with four statistics: Unacknowledged Alarms (0), Total Alarms (2), Units Online (5), and Units Offline (0). Below this is a map showing the location of the devices. At the bottom, there is a table listing the devices and their status.

Action	Device Name	Status	Power	Battery	Last Response	
<input type="checkbox"/>	Acme WasteWater Treatment Plant	Details	Alarms	On	100%	Online
<input type="checkbox"/>	Acme Wet Well Alarm	Details	Okay	On	100%	Online
<input type="checkbox"/>	PHL Water Plant	Details	Okay	On	100%	Online
<input type="checkbox"/>	River Road Pump Station	Details	Okay	On	100%	Online
<input type="checkbox"/>	Valley Forge Booster Station	Details	Okay	On	100%	Online

The dashboard will list all of the devices on your account. This page is automatically updated with the most current information available.

The numbers at the top will show how many Unacknowledged Alarms, Current Alarms, Units Online, and Units Offline that currently exist for all devices on your account.

The map will show the location of any device on your account that has an address or GPS location listed. You can hover over the icon to see the device name and status. If the icon for the device is green, your device status is OK. If it is red, your device has alarms. You can click on the icon to show the zones for the selected device.

Sentry Installation and Setup Guide

At the top of the page, you will see the device name, description, address and alarm status.

You will also see all of the zones for your device in the table.

Zone – The name of the zone

Value – The current value of the zone

Status – The current status of the zone

Min/Max – Displays the highest and lowest values recorded

If the device has any unacknowledged alarms, a symbol will be displayed in the status column

CONFIGURE DEVICE

At the top of the dashboard, click *Configure Device* to go to the device and zone programming screens.

The box on the left will display all of your configureable zones, as well as Device (for general device settings), Power, Battery and Relay Output. As you select an option, the form on the right will change to display the appropriate data. Complete the address fields to identify the location of your device on alarm emails. This information can also be used to show the device location on the map. The 'Map Settings' section let's you select the source for locating the map icon. If you select 'Show location using device GPS data' the unit must have the GPS antenna connected and positioned to have a good view of the sky. Using this setting the GPS data will automatically update whenever the device moves to a new location. Note that GPS updates may take up to 60 minutes. The last option 'Show location using coordinates below' let's you enter your own coordinates.

This page also contains settings for the *Device Offline* alarm and for *Standby Mode*. The *Device Offline* alarm will notify you if your devices stop communicating with the sensaphone.net servers for the programmed time duration. You can also receive a notification when the device comes back online by enabling the "Offline Return-To-Normal" option. You can create a custom list of people to be notified specifically for offline alarms by selecting the "Offline Alarm Delivery tab" at the top of this section and choosing Custom Alarm Delivery.

Once you have completed your programming, click on the *Save Settings* button at the bottom of the page.

The screenshot displays the 'Configure Device' interface for a device named 'Phonetics Inc'. The left sidebar lists various configuration categories: Device, Power, Battery, Lithium Battery, 1: Office Temperature, 2: Freezer Temperature, 3: Refrigerator Temperature, 4: Leak Detector, 5: Controller Fault, and 0: Output. The main content area is titled 'Offline Alarm Delivery' and includes an 'Audit Log Links OFF' button. It shows the device's serial number (00-07-F9-01-0C-5B) and subscription (Premium). The 'Device Status' is 'Alarms'. The 'Device Information' section contains fields for Name, Description, Address Line 1, Address Line 2, City, State/Subdivision, Postal Code, Country, and Timezone. The 'Map Settings' section has radio buttons for location display options: 'Do not display device location', 'Show location using device GPS data' (selected), 'Show location using device address', and 'Show location using coordinates below'. The 'Device Settings' section includes 'Standby Time' (1 Hour), 'Offline Timeout' (30 minutes), and 'Offline Return To Normal' (Enable selected). A note at the bottom states: 'Note: Offline timeout will notify users when the device has stopped communicating with the cloud. Status Info'.

CELLULAR DIAGNOSTICS

This section provides technical details about the cellular signal as well the GPS coordinates calculated by the unit. This data can be useful when troubleshooting connectivity problems. Note that the cellular network automatically adjusts the transmit power of the Sentry to maintain a reliable connection.

Cellular Diagnostics

Reference Signal Received Power RSRP: -103 dBm

Reference Signal Received Quality RSRQ: -10.5 dB

Received Signal Strength Indicator RSSI: -75 dBm

GPS Coordinates: 39.8702385 latitude -75.4412047 longitude

FIRMWARE

The Sentry firmware can be updated over-the-air. You can choose to have the unit automatically update its firmware when a new version becomes available by checking the box for 'Automatically Update' or you can have the unit install new firmware on-demand by clicking the 'Update Firmware' button.

ZONE PROGRAMMING

Select the zone you would like to configure from the box from the left. A sample screen for a temperature sensor is shown below.

The screenshot shows the 'Refrigerator Temperature' configuration screen. On the left is a sidebar menu with options: Device, Power, Battery, Lithium Battery, 1: Office Temperature, 2: Freezer Temperature, 3: Refrigerator Temperature (selected), 4: Leak Detector, 5: Controller Fault, and 0: Output. The main area has two tabs: 'Refrigerator Temperature' (active) and 'Zone Alarm Delivery'. A 'Save Changes' button is at the bottom left. The 'Refrigerator Temperature' tab shows: Current Value 37.5F, Zone Enable (checked), Zone Name 'Refrigerator Temperature', Zone Type '2.8K Thermistor F', Calibration '0', Alarm Low '32', Alarm High '44', and Alarm Delivery (checked). The 'Zone Alarm Delivery' tab shows: Audit Log Links OFF, Alarm Delivery Settings, Recognition Time (0h 10m 0s), Alarm Hold Time (0m 1s), Return To Normal (checked), Auto Acknowledge (unchecked), and Alarm Reset (checked, 2h 0m).

ZONE PARAMETER DEFINITIONS

Enable/Disable: This setting determines if the Zone is being used (Enabled) or not (Disabled). Selecting Disabled will remove the gauge from the Summary screen.

Name: Enter a name for the sensor you are monitoring which describes its purpose and/or location. The name will appear on the Device Details screen as well as on alarm messages.

Type: Choose the type of sensor you are connecting to the Zone input. For temperature sensors choose either degrees F or C.

Units: The Units field is used to describe the units of measure for the value being monitored. When Temperature is selected the Units field will automatically display F (Fahrenheit) or C (Celsius). When you select Normally Open (NO) or Normally Closed (NC) you can choose from several preset descriptions for the Open and Closed state of the input. The first word always describes the Open state of the contact and the second the Closed state. If you choose Custom you can enter your own

Sentry Installation and Setup Guide

text for the Open and Closed states. To do this simply type the words into the lower Units field and separate them with a slash (/). For example, "Slow/Fast", "Safe/Danger", "Dry/Wet".

Calibration: This field can be used to offset the Zone value either positive or negative if there is some error in the reading.

Alarm Low: This is used to determine the low level at which a temperature has reached the alarm threshold. The value must fall below the Alarm Limit to trip an alarm.

Alarm High: This is used to determine the high level at which a temperature Zone has reached the alarm threshold. The value must exceed the Alarm Limit to trip an alarm.

Alarm Delivery Enable/Disable: When Enabled, alarm messages will be delivered, if set to Disabled alarm messages will not be delivered.

Recognition Time: This is the length of time that an alarm condition must be present before a valid alarm exists and message delivery is started.

Alarm Hold Time: When an alarm occurs, the *Alarm Hold Time* will latch the alarm condition for the programmed time period, thus preventing redundant alarms from sending additional notification messages. This is useful for alarms that are likely to trip several times within a short time period, such as motion detectors.

Return to Normal Enable/Disable: This feature instructs the Sentry to send a message when a zone input has changed from an alarm condition back to a normal condition. Anyone who received the original alarm message will also be sent the Return-to-Normal message.

Auto Acknowledge Enable/Disable: Enabling this option will automatically acknowledge an alarm when the zone goes back to normal. As a result, all remaining alarm notifications will be cancelled.

Alarm Reset Enable/Disable: This setting enables or disables the Alarm Reset Feature. The Alarm Reset feature is used to re-send alarm messages in the event that a fault condition is not corrected in a timely fashion. If an alarm continues to exist for the duration of the programmed Reset Time (see below) the alarm will reset (reactivate) and the alarm message delivery process will begin all over again. This is an optional feature.

Alarm Reset Time: This is the time allowed for an alarm's fault condition to be corrected before the Sentry resets (reactivates) the alarm and begins the message delivery process all over again. It is recommended that this be set to no lower than 30 minutes to prevent numerous messages from being sent.

MANAGE USERS

The sensaphone.net website allows you to set up users that will be linked to your account. Each user can be configured to have their own login for website access and/or be contacted for alarms. In addition, you can choose to give alarm acknowledgement capability to each user.

There are several levels of permissions that can be assigned to each user. You can also enter contact information for alarm delivery purposes. From the main menu, select *Users*, then *Manage Users*. To add a new user, click on the *Add User* button. The example below shows a user setup as an administrator with four contact destinations.

User Details
[View All Users](#) * = Required Input Field

The following defines the various Site Access levels:

Administrator – Full site access, all devices on your account

Supervisor – Gives the user access to the Dashboard, device-specific pages (for example, Device Details), Manage Users, and Manage User Groups, but for only the devices you choose for them (chosen under the Device Groups section of the form). Supervisors will have the ability to create new users, but they can only give the users Supervisor access or lower.

User – Gives the user access to the Dashboard, but only shows the devices you choose for them (chosen under the Device Groups section of the form)

Read Only – Gives the User the ability to view the Dashboard, Zone Details, Zone programming, and History Logs.

None – No access to the website

Alarm Delivery – Choose whether you would like the user to be able to receive alarm notifications or not.

Disabled – No alarm delivery

Inform Only – User is notified about the alarm, but cannot acknowledge it

Allow Acknowledgement – User is notified about the alarm and is able to acknowledge it

User Information

Next, enter details about this user. The user's name is the only required information.

Contact Details

The 'Contact Details' section is where you enter the telephone numbers, text numbers, and email addresses to send alarm messages. {Note that phone calls and text messages require a Premium Ethernet or Cellular subscription. Email alarm delivery is free}. See sample programming in the figure above. To add additional contacts click "Add Contact". Be sure to add all of

Sentry Installation and Setup Guide

your possible contact methods in this section. You can choose which ones get used on the Default Alarm Delivery Schedule or Zone Alarm Delivery Schedule.

Text messages require verification. When you enter a text message telephone number the system will send verification message and request that you respond Yes or No. You must reply Yes in order to receive alarm messages. Once the system receives confirmation a green check mark will appear next to the text telephone number to indicate that the number has been verified.

Telephone Number Programming

A '1' at the beginning of the telephone number is not required for calls to the USA, Canada, or other countries that are part of the North American Numbering Plan (NANP). See list below:

Countries in the North American Numbering Plan:

- United States
- Canada
- Caribbean Islands
 - Anguilla, Antigua & Barbuda, The Bahamas, Barbados, Bermuda, British Virgin Islands, Cayman Islands, Dominica, The Dominican Republic, Grenada, Jamaica, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Sint Maarten, Trinidad and Tobago, Turks & Caicos
- U.S. Territories
 - American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands*

*Technically some of these are not in North America, but since they are part of the U.S., they use the U.S. telephone system.

For all other countries you have to enter an exit code first (+ or 011), then the country code, and then the number. Do not include trunk codes which are typically displayed as (0) near the beginning of the number.

- For example, a call to the UK could be programmed as either:

+44 20 7950 4631

or

011 44 20 7950 4631

You can also create a time schedule to limit when you'll receive alarm messages. There is an overall *User Schedule* as well as individual Schedules for each contact. The default setting for all schedules is enabled, 24/7. In the sample screen below, the highlighted section shows the times when this user will be contacted for alarms:

User Schedule

[Back to User](#)

User: Joe McHenry

Account Timezone: Eastern Time

Please configure the schedule during which the user's contacts are available to receive alarms.

6am							
7am							

*Note that if you configure both a User Schedule and individual Contact Schedules, there must be overlap in order for alarm messages to be delivered.

Login Details

Users will login with an email address and password. Enter this information in the *Login Details* section. In the event that a user forgets his/her password they can use the reset password feature on the main login page.

Device Access

For accounts with multiple users and/or devices, you can choose to limit a user's access to selected devices. In the *Device Access* section, choose which units this User can access. See sample screen below:

Device Access

Administrators have access to all devices and groups.

<input checked="" type="checkbox"/>	Acme Wet Well Alarm
<input checked="" type="checkbox"/>	PHL Water Plant
<input checked="" type="checkbox"/>	River Road Pump Station
<input type="checkbox"/>	Valley Forge Booster Station
<input type="checkbox"/>	Acme WasteWater Treatment Plant

Click on 'Save Changes' once you are finished.

MANAGE USER GROUPS

Allows you to set up groups of users that can be used on other site pages.

Select the group you wish to edit from the dropdown menu, or select *Create New Group* to make a new group.

Make sure to give each group a unique, descriptive name so they can be easily referenced.

Click on the plus icon to add users to the group. A pop up modal window will show that will list all the alarm users you have added to your account from the Manage Users page (see that page description for more information).

You can select an entire user (all destinations listed under that user at the time of the alarm will be notified) or individual destinations of the user.

Click on the red X icon to remove that user from the group.

Once you are finished adding and removing users, click on the *Save Group* button at the bottom of the page.

ALARM DELIVERY

The Alarm Delivery section is where you configure the people that will be contacted when an alarm occurs. You can setup a *Default Alarm Delivery Schedule* (i.e. contact list) for each device or you can create a separate *Zone Alarm Delivery Schedule* for each individual zone. A combination of both can also be used (e.g. some zones use the default schedule and others use a custom schedule). The first step is to configure your Users and Contacts as described in the *Manage Users* section. If you haven't completed that step please do it first.

Default Alarm Delivery Schedule

To get started select a device from the Dashboard and click *Details*. Next click the *Default Alarm Delivery* button. Click the *Add Destination* button to select people from your User list. You can select all of the User contacts or just a few if desired. See sample screen below:

Default Alarm Delivery - Sentinel Demo

3 Delivery Destinations

Delivery Escalation Tiers Add Tier Collapse Delete Schedule

Configure who gets contacted when an alarm condition is detected.

Tier 1 Initial delivery immediately after alarm condition is detected Sequential Delivery Add Destination

Order: --

Delivery Destinations

User Name: Frank Johnson
 Contact(s):
 • Frank Johnson Text - 888-777-5555 (Text)
 • Frank Johnson Cell - 888-777-5555 (Phone)
 • Frank Johnson Work Email - frank@mycompany.com (Email)

Delete

Tier 2 Delivery Tier Time Delay: 15 minutes Sequential Delivery Add Destination

Order: --

Delivery Destination

User Name: Joe McHenry
 Contact(s):
 • Joe's Office - (888)555-1234 (Phone)
 • Joe's Cell - 333-777-2222 (Text)
 • Joe's Home - (111)888-4444 (Phone)
 • Joe's Work Email - jmcHenry@mycompany.com (Email)

Delete

Tier 3 Delivery Tier Time Delay: 30 minutes Sequential Delivery Add Destination

Order: --

Delivery Destination

User Name: Joseph Smith
 Contact(s):
 • Cell Phone - 555-222-7788 (Text)
 • Work Email - jsmith@mycompany.com (Email)

Delete

Continue clicking the *Add Destination* button to add additional User's to the list. If you would like to insert a delay between the first User (or group of Users) and the next User, click the *Add Tier* button and enter the delay time. Users in this Tier will not be contacted until the delay time expires. Click *Save Changes* when your schedule is complete.

*Note that the Tier Delay timer starts at the time the alarm occurs. If the alarm is acknowledged before the delay time expires then Users in the 2nd Tier (and beyond) will not receive the alarm message. See sample programming screen below:

Default Alarm Delivery - Sentinel Demo

Zone Alarm Delivery Schedule

A Zone Alarm Delivery Schedule is an alarm contact list that only applies to one specific zone. You can create a separate Zone Alarm Delivery Schedule for each individual zone if required. To configure a *Zone Alarm Delivery Schedule* select a Zone from the *Device Details* page. Then click the *Zone Alarm Delivery* tab on the right. Select *Custom* to configure a contact list for the selected zone. Follow the steps as described above to complete the schedule.

Quick-Add Destinations

Quick-Add Destinations are those that can be easily entered to the notification list without creating a User Account. Note, however, that destinations added here will be inform-only (e.g. **cannot acknowledge alarms**). This entry method is useful for sending messages to people who do not require a user account in the system but may want to be informed when a particular alarm occurs.

Alarm Acknowledgment

Alarms can be acknowledged from the dashboard page by selecting a device using the checkboxes next to each device, and then clicking the “Action” drop-down at the top of the screen. You can acknowledge both Device Offline alarms or Zone alarms. Devices with ‘Unacknowledged’ alarms are identified with an exclamation point within a triangle. Once the alarm is acknowledged this symbol will disappear. You can acknowledge multiple alarms on multiple devices at the same time. Alarms can also be acknowledged during telephone calls by entering 555 when prompted, or by clicking the web link contained in email and text messages, as well as within the Sensaphone mobile app.

LOGS

The Sentry includes an Alarm Log which lists all alarm activity for the selected device. You can narrow down the messages by individual zone or you can select multiple zones. There is also an option to Print the data. To get to the Device Logs section, click the Details button from the Dashboard for the device you would like to view, then click the Device Logs button.

DEVICE MANAGEMENT

You can add, modify, and remove Sentry devices from your account on the Manage Devices screen. From the main menu select Admin, then Manage Devices. Listed below are the device-related actions that can be done.

Adding Devices - To add a new device to your account, enter the device serial number (located on the bottom of the unit in the format 00:07:F9:00:00:00) and give the device a name, then click *Add Device*.

Reboot Device – If your Sentry is online you can send it a command to reboot. To perform this function select your device from the list to the left and then choose Reboot Device from the drop down box at the bottom of the page, then click Submit. Your Sentry will reboot and then reconnect within a few minutes. Your Sentry programming will remain intact.

Remove From Account - To remove a device from your account, select it from the list to the left and then choose Remove from Account from the drop-down box at the bottom of the page. Then click *Submit*.

Reset to Default Values - If your Sentry is online you can send it a command to reset its programming to default values. To perform this function, select your unit from the list to the left and then choose Reset to Default Values from the drop-down box at the bottom of the page. Then click Submit. Allow several minutes for your device to complete the reset process and then reconnect.

Manage Devices

Your Devices

- ☐ Acme Wet Well Alarm - 00-07-F9-00-70-B1
- ☐ PHL Water Plant - 00-07-F9-00-71-88

Submit

Add a Device

Serial Number 00-07-F9-00-11-22

Device Name My Device

Add Device

DEVICE GROUPS

In cases where you have many devices and many users it may be desirable to create Device Groups. These can make it easier to assign device permissions to specified Users. From the main menu select Admin, then Device Groups. In the main window, you will see a list of all your devices and any groups you may have already created. Devices are shown with a green device icon and groups are shown with a black icon. You can have multiple groups, and you can even have groups within a group. If a device icon is lined up on the left-most side of the window, they are not in a group.

To add a new group, click on the Add Group button at the top of the page. A 'New Group' icon will appear in the list. You can rename the group by right clicking on it and selecting Rename. To move a device into a group, click on the device and drag it into the group. Continue adding devices until you're finished, then click Save Groups.

The blue number shown on the group icon shows how many devices are within that group. To remove a group, right click on the group and select Delete. Any devices in that group will be moved up one level. For example, if a group that had two devices was deleted, the two devices would be shifted to the left and would no longer be in any group. You can also click and drag a device or group to reorder them. To search through your devices click on Filters. You can choose to hide any device or group that does not match your search, and you can choose to only search through your devices and not your groups. Once you are finished editing your groups, click on the Save Groups button at the bottom of the page.

ACCOUNT SETTINGS

The Account settings page is used to configure a number of options that apply across the board to your account. This page is only available to users with 'Admin' site access level. To access the account page select 'Admin' from the main menu, then 'Account'.

NAME: Give your account a 'Name' that best describes the organization managing your devices.

TIME ZONE: Set the 'Time Zone', which will serve as the default for all of your users. This will be important to ensure that any schedules you configure will operate at the appropriate times.

There are several 'Account Features' that you can configure to have the system operate in a certain manner.

REQUIRE SITE USER: When Admins and Supervisors are configuring Users, you can force the system to require that all User's receive website access by checking the 'Require Site User' box.

REQUIRE ALARM USER: Similarly, you can also require all Users to have the ability to receive alarm notifications by checking the 'Require Alarm User' box.

USER GROUPS: You can choose whether or not to allow 'User Groups' to be created within the system. Check the 'User Groups' check box to permit user groups to be used within the system.

HIDE DISABLED ALARMS: On the device details page you choose to hide the alarm status of a zone if 'Alarm Delivery' is set to disabled for the selected zone. This can be convenient when a zone is beyond the alarm limits for maintenance reasons and you don't want to display the status as 'Alarm'.

CSV Email: Enabling this setting exposes an option on the User pages to use the CSV email message format used by some state department of environmental protection agencies (such as the MASS DEP). Note that enabling this option will expose a similar setting on the User pages so that you can create a specific user with a specific email address to receive the specially formatted message.

Password Strength: This setting allows you to set minimum requirements for User passwords. 'Normal' requires only 8 characters, 'Strict' requires 15 characters including upper/lower case, a number, and a special character.

CHAPTER 3: CONFIGURING THE RELAY OUTPUT

The Sentry includes a relay output that can be used to control a light, siren, or other low voltage device. The output can be configured to switch either manually or automatically when a zone changes state or exceeds the alarm limits. To program the output click *Output* from the *Device Details* or *Configure Device* screen. The following configuration page will appear:

Enter a Name so that you'll know what the Output will be controlling. The Output can operate in Manual mode or Automatic mode. In manual mode you can turn the relay ON or OFF through the web page or the mobile App. To manually switch the relay output, click in the State field and select either ON or OFF, then click *Save Changes*. The change request will be sent to the Sentry and the *Current Value* will update after the output change has successfully completed.

In Automatic mode the relay can be programmed to turn-on automatically when certain conditions are met. Listed below is a description of the parameters that apply to the automatic modes.

Input Selection - Next to the Automatic mode selection box is another drop-down that allows you to select which zones will control the output. There are four options (Zone List, Type List, All Inputs, and Limit Zones:).

Zone List: This option allows you to individually select which zones will cause the output to switch. Check the boxes next to the desired zones.

Type List: This option allows you select zones based on the zone Type. For example, you could have all of the zones configured for Temperature control the output.

All Inputs: This option selects all of the inputs (zones).

Limit Zones: This option allows you to independently control the output based on the value of one or two zones using greater-than, less-than, or equal-to comparison statements. A separate Output-On and Output-Off instruction can be configured with its own comparison value. See sample below:

Action - This setting determines what the Output will do when the selected zone (or zones) exceeds the alarm limits. You can have the relay Activate (turn-on), Deactivate (turn-off), or Cycle (ON under normal conditions, momentarily OFF for 10 seconds when an alarm condition occurs, then back ON).

Trigger - The trigger determines what will cause the output to change state. There are 3 options to choose from which are described below:

Sentry Installation and Setup Guide

Unacknowledged Alarms: Choosing this option will make the Output change to the setting defined by the Action for as long as an Unacknowledged Alarm persists on the selected zones. Once the alarm is acknowledged the Output will revert back to its normal position.

Alarm Condition: Choosing this option will make the Output change to the setting defined by the Action for as long as the selected input(s) remain in Alarm, regardless of acknowledgement. Once the selected zones return to their normal state the Output will revert back to its normal position.

Zone State: Choosing this option will make the output change to the setting defined by the Action as soon as the selected zones exceed the alarm limits. In other words, the alarm recognition time is not enforced, and the Output will change instantly. Once the selected zones return to their normal state the Output will revert back to its normal position.

Relay Output Wiring

The relay output can be used to turn on a light, siren, or other low voltage device. The relay is rated for up to 30VAC/VDC 1 Amp. A sample wiring diagram is shown below:

APPENDIX A: WEEKLY TESTING PROCEDURE

We recommend that you test your Sensaphone weekly to be sure it is functioning properly. This will ensure that when a problem arises the Sensaphone will be ready to alert the appropriate personnel.

There are several tests that can be performed:

- 1.) Create an alarm on each zone by tripping all connected sensors.

Temperature sensors: Heat or cool the sensor.

Motion sensors: Have someone walk in front of the sensor.

Door/window sensors: open the door/window.

Water sensors: Apply a small amount of water beneath the sensor or use a wet towel and touch it to the sensor probes.

Humidity sensors: Raise the humidity around the sensor by holding a cup of very hot water beneath the sensor.

- 2.) Allow the unit to contact all programmed users. This will make sure that the Sensaphone is programmed properly. It will also prepare personnel to respond appropriately when they receive a message from the Sensaphone.

- 3.) Test the battery (if installed) by unplugging the AC adapter and making sure that the Sensaphone continues to function. Keep the AC adapter unplugged so that a Power Failure alarm occurs. Plug in the AC adapter after the unit has finished.

- 4.) Keep a log of your tests, noting the date and whether the Sentry passed in each category tested. An example of such a log is shown below. (See “Test Log” at the end of this manual.)

WEB600 Test Log						
Date	Inputs		Alarm		Battery

APPENDIX C: SPECIFICATIONS

ALERT ZONES

Number of Zones: 5

Zone Connector: terminal block

Zone Types: N.O./N.C. contact, 2.8K Thermistor (-109° to 115°F, -85° to 57°C)

Zone Characteristics: 28.7K Ω to 3.3V (temperature/contact)

A/D Converter Resolution: 12 bits ± 2 LSB

Zone Protection: 5.5VDC Metal Oxide Varistor with fast acting diode clamps.

RELAY OUTPUT

Rated for 1A 30VAC/ 1A 30VDC Maximum

LED INDICATORS

Power: On steady when the unit is powered on.

Alarm: Off when no alarm exists.

Cellular Signal Strength: 4 LEDs

Online: On when device is online with Sensaphone.net. Blinks when connecting.

Relay Output: On when relay is activated.

COMMUNICATION TYPE:

LTE Cat-M1 Cellular Technology with GPS

POWER SUPPLY

Power Supply: 90-260VAC/12VDC 50/60Hz 7.5W wall plug-in transformer w/6' cord.

Power Consumption: 2.6 Watts

Power Protection: Metal Oxide Varistor

BATTERY BACKUP

Rechargeable Battery: Internal 12 Hr NiMH Battery Pack (Part # BAT-0036).

Memory/Clock Battery: Internal 5-10 yr CR2032 lithium (Part # BAT-0023).

ENVIRONMENTAL

Operating Temperature: 32–122° F (0–50° C)

Operating Humidity: 0–90% RH non-condensing

Storage Temperature: 32°–140° F (0–60° C)

PHYSICAL

SNT-0500

Enclosure: Powder-coated aluminum enclosure with tabs for wall or panel mounting

Physical Dimensions: 6.1" x 4.7" x 0.9" (155 mm x 120 mm x 23 mm)

Weight: 1 lb. (0.45 kg)

APPENDIX D: THERMISTORS

2.8K THERMISTOR DATA

Degrees Celsius	Resistance (Ohms)
-50	187,625
-40	94,206
-30	49,549

APPENDIX E: RETURNING THE UNIT FOR REPAIR

In the event that the Sentry does not function properly, we suggest that you do the following:

- 1) Record your observations regarding the Sentry's malfunction.
- 2) Call the Technical Service Department at 610-558-2700 prior to sending the unit to Sensaphone for repair.

If the unit must be sent to Sensaphone for Servicing, please do the following:

- 1) Unplug the AC power supply from the wall outlet and disconnect all sensors from the alert zones.
- 2) Carefully pack the unit to avoid damage in transit. Use the original container (if available) or a sturdy shipping box.
- 3) You must include the following information to avoid shipping delays:
 - a) Your name, address and telephone number.
 - b) A note explaining the problem.
- 4) Ship your package to the address below:

SERVICE DEPARTMENT

SENSAPHONE

901 Tryens Road

Aston, PA 19014

- 5) Ship prepaid and insured via UPS or US Mail to ensure a traceable shipment with recourse for damage or replacement.
